Just one capsule a Day

ACTIVITAL-Z™

Activital's balanced combination rejuvenates and strengthens body organs and help maintain good health.

• Product • Compositions • Indications • Dosage • Contents

ALLOPATHIC PRODUCTS

ABCAVIR

Each tablet contains:300 mg

Abacavir.....300 mg

Indications: Abacavir is used in combination with other medications to treat human immunodeficiency virus (HIV) infection in patients with or without acquired immunodeficiency syndrome (AIDS). Abacavir is in a class of antiviral medications called nucleoside reverse transcriptase inhibitors (NRTIs). It works by slowing the spread of HIV infection in the body. Abacavir is not a cure and may not decrease the number of HIV-related illnesses. Abacavir does not prevent the spread of HIV to other people.

Dosage: Abacavir comes as a tablet and a solution (liquid) to take by mouth. It is usually taken twice a day with or without food. To help you remember to take abacavir, take it around the same time every day. Follow the directions on your prescription label carefully, and ask your doctor or pharmacist to explain any part you do not understand. Take abacavir exactly as directed. Do not take more or less of it or take it more often than prescribed by your doctor.

Continue to take abacavir even if you feel well. Do not stop taking abacavir without talking to your doctor.

ACTIVITAL-Z

Each 2gm Contains:

Dextrose	17.5mg
Sucrose	14mg
Zinc Sulphate	32.5mg
Vitamin C	50mg
Vitamin B1	2.5mg
Vitamin B12	2.5mg
Di-methionine	50mg

Indications: Activital is a comprehensive daily food supplement that has a balanced combination of vitamins, minerals and greenery.

Dosage: Activital can be taken after the meals any time during the day but preferably should be taken after breakfast. In case you find it difficult to swallow the capsule with a liquid, you may cut it open, press the contents on the spoon and mix a little jam or honey before taking it. Activital can be taken by both male and females over 12 years of age. Activital is suitable for diabetics as it does not contain sugar.

ALFUZIN

Each tablet contains:10 mg

Alfuzosin.....10 mg

Indications: Alfuzosin is used to treat symptoms of benign prostatic hyperplasia (BPH, enlarged prostate) such as frequent, urgent need to urinate during the day and at night, weak urine stream, and difficulty urinating. Alfuzosin is in a class of medications called alpha-1 blockers. It works by relaxing the muscles in the prostate and bladder neck to allow urine to flow more easily.

Dosage: As per the physician's advice.

ADEVERA

Each uncoated tablet contains:10 mg

Adelovir Dipivoxil.....10 mg

Indications: Adevvera® (adefovir dipivoxil) is a prescription medicine used to treat chronic infection with H - B virus (HBV) in adults. Adevvera does not cure chronic Hepatitis B, and it does not reduce the risk of spreading Hepatitis B to others. An antiviral medicine, Adevvera helps stop H - B virus (HBV) from multiplying by blocking HBV DNA polymerase, an enzyme that is necessary for the replication of the virus in the body.

Approved colours used

Dosage: Adevvera® (adefovir dipivoxil) is provided as a 10 mg tablet that you take once a day by mouth. Adevvera can be taken with or without food. If you have or develop kidney problems, your doctor may tell you to take the pill on a different schedule.

DITANEX - 250 mg / 400 mg

Each capsule contains:

Didanosine.....	250 mg
Difenoquine.....	400 mg

Indications: Didanosine (d-DAN-oe-seen) (also known as ddI) is used in the treatment of the infection caused by the human immunodeficiency virus (HIV). HIV is the virus responsible for acquired immune deficiency syndrome (AIDS).

Didanosine (ddI) will not cure or prevent HIV infection or AIDS; however, it helps keep HIV from reproducing and appears to slow down the destruction of the immune system. This may help delay the development of problems usually related to AIDS or HIV disease. Didanosine will not keep you from spreading HIV to other people. People who receive this medicine may continue to have the problems usually related to AIDS or HIV disease.

Dosage: As per the physician's advice.

Vitamin E Capsules

- ✓ Vitamin E is an anti-oxidant that protects body cells from destruction by preventing them from reacting with oxygen.
- ✓ It is a natural, non-toxic blood thinner, preventing clots from forming in your blood so you don't get heart attacks or strokes.
- ✓ Vitamin E also allows muscle cells to function effectively on small amounts of oxygen. This can boost your energy level.

TIFOLIC

Each tablet contains:

Folic Acid	5 mg
Doxylamine Succinate	10 mg
Pyridoxine HCl	10 mg

Indications: Tifolic is indicated in nausea and vomiting during pregnancy.

Dosage and Administration: 2 tablets at bedtime. If required, 1 additional tablet in the morning and 1 tablet in the afternoon.

Presentations:	MRP	Retailer	Stockist
10 tablets	17.50	14.00	12.60

TP-ROX-A

Each tablet contains:

Roxithromycin	150 mg
Amboxolol	60 mg

Indications: UTI, RTI, ENT infections, skin and soft tissue

infections, other infections caused by susceptible organisms.

Dosage: Adults: 150-300 mg b.i.d. 30 min before meals for 7 days. Children: 2.5-5 mg/kg every 12 hours for 7 days.

Presentations:	MRP	Retailer	Stockist
10 tablets	63.50	50.80	45.72

TEFAQUINE - 300 mg

Each tablet contains:

Quinine Sulphate	300 mg
------------------	--------

Indications: Chloroquine-resistant falciparum malaria, and as alternative therapy for chloroquine-sensitive strains of P. falciparum, P. malariae, P. ovale and P. vivax.

Dosage: Chloroquine Tablets should be taken with food or after meals.

Adults: 300 mg (2 tablets) every 8 hours for 3 to 7 days.

Presentations:	MRP	Retailer	Stockist
10 tablets	45.50	36.40	32.76

TOCODER

Each soft-gel capsule contains:

Vitamin E B.P.	400 mg
----------------	--------

Indication: Vitamin E is a powerful antioxidant that works to protect cells in the body from damage caused by free radicals.

Free radicals are highly reactive substances that result from normal metabolism as well as from exposure to factors in the environment like cigarette smoke and ultraviolet light. They cause damage to body cells by attacking the cell's membranes, proteins and DNA and ultimately contribute to the development of health problems such as heart disease and cancer. Vitamin E is especially important in protecting blood cells, the nervous system, skeletal muscle and the retinas in the eyes from free radical damage.

Dosage: As per the physician's advice.

Presentations:	MRP	Retailer	Stockist
10 soft caps	18.95	15.16	13.64

TOZOL-20

Each capsule (E.C. granules) contains:

Omeprazole	20 mg
------------	-------

Indications: Suppresses gastric acid secretion by specific inhibition of the enzyme H⁺KATPase present on the secretory surface of the gastric parietal cell. This blocks the final and common step in gastric acid secretion. Both basal and stimulated acid secretions are inhibited irrespective of the stimulus. Peptic activity is reduced. It suppresses H. Pylori.

Dosage: As per the physician's advice.

Presentations:	MRP	Retailer	Stockist

ARTEMOTIAL

Each 2ml contains:

β Arterether	150 mg
Arachis Oil I.P.	q.s.

Indications: Artemotial is concentrated in parasitized erythrocytes. The functional group responsible for anti-malarial activity of α / β arterether is endoperoxide bridge. Iron from the digested haemoglobin of the parasite's victim reduces this bridge, releasing a highly reactive free radical iron species which causes lysis of the parasite cell.

Dosage: Adult: 150mg i.e. 1 ampoule of β arterether once daily for 3 consecutive days.

Children: 3mg/Kg per day administered by intramuscular injection over a 3-day period.

MIFEBORT

Each film coated tablet contains:

Mifepristone	200 mg
Excipients	q.s.

Approved colours used

Indications: Mifepristone is indicated for the medical termination of intrauterine pregnancy through 49 days pregnancy. For purposes of this treatment, pregnancy is dated from the first day of the last menstrual period in a presumed 28 day cycle with ovulation occurring at mid-cycle. Any intrauterine device (IUD) should be removed before treatment with Mifepristone begins. Patients taking Mifepristone must take 400 mg of Misoprostol two days after taking Mifepristone unless a complete abortion has already been confirmed before that time (see Dosage And Administration). Pregnancy termination by surgery is recommended in cases when Mifepristone and Misoprostol fail to cause termination of intrauterine pregnancy.

Dosage: Treatment with Mifepristone and Misoprostol for the termination of pregnancy requires three office visits by the patient. Mifepristone may be administered only in a clinic, medical office, or hospital, by or under the supervision of a gynecologist, able to assess the gestational age of an embryo and to diagnose ectopic pregnancies. Gynecologist must also be able to provide surgical intervention in cases of incomplete abortion or severe bleed ng, if necessary. Mifepristone. Unless abortion has occurred and has been confirmed by clinical examination or ultrasonographic scan, the patient takes two 200 mg tablets (400 mg) of Misoprostol orally.

Presentation:	MRP	Retailer	Stockist
